

# INN-O-WALL® - liquid feeding pen wall

For weaners the liquid feeding pen wall will also be delivered with ad.lib. liquid feeding with stainless steel troughs and head partitions.  
Head partitions reduce aggressions and result in more eating time and thereby more pigs per eating area.

## examples

### Sturdy and strong

- Complete unit with horizontal bars combined with plastic panels and strong stainless steel

### Well-tested

- Designed in collaboration with the Danish Applied Pig Research Scheme

### Quick outlet

- One or two integrated 63 mm down pipes (same diameter as standard liquid feeding tubes) and no T-branch implies that nothing impedes the feed during the outlet.

### Low aggression level and uniform pigs

- The feed is dispersed at once in the whole trough

### Minimum feed waste

- Stainless steel trough with sturdy inner rolled edges

### Hygienic

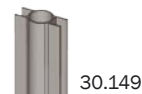

- All joints are sealed - easy to clean

## FACTS

Length cm:	Weaners: 118-580. WTF and finishers: 150-580. Young females: 150-520
U-profiles:	2 mm stainless steel
Panels:	35 x 250/500/750 mm
Down pipe:	1-2 pcs. 63 mm plastic pipe
Trough:	1 mm stainless steel
