

INN-O-STALL® FREE ACCESS

Sows can choose between staying in the group or in a crate

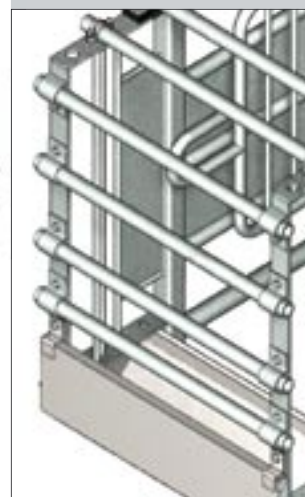

Easy for the animals to close the crate behind them

Patented rear gate is designed to avoid injuries. And at the same time it provides free access for the sow.

No bars across the sow. Good working environment

examples

Safety for the sow

- Gates and equipment are designed to avoid crushing. Closed partitions by the trough reduce aggressions. Patented locking system prevents access for other sows

Easy access for personnel

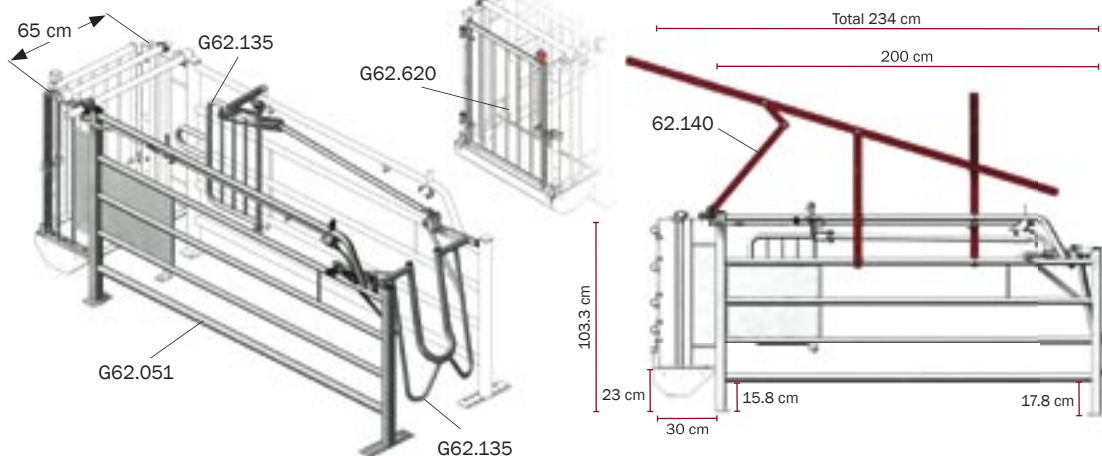

- No interfering bars across the sow. The opening in the rear gate provides free access

User-friendly

- Central locking system can be operated with only one hand from both pen and passage

Durable

- Strong construction provides long economic life
