

TUBE-O-MAT® TUBE

The TUBE-O-MAT® TUBE model is the most simple and efficient automated mix feeder in the market.

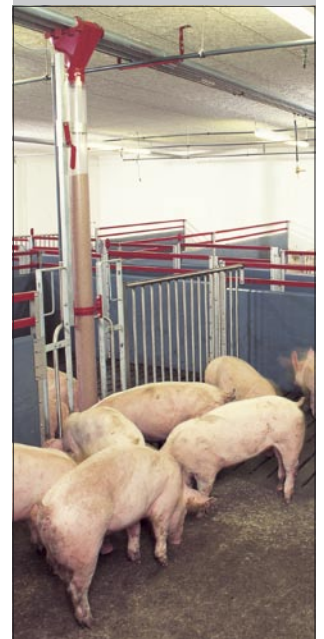

The feeder is combined with a fully automated feed delivering system. This provides the advantages of a completely closed feeding system from silo to feeder.

Aroma and taste are preserved, and the pigs eat with more gusto.

Dust volumes in housing are reduced, and foreign matter does not get in the feed.

The vertical, transparent feed pipe prevents bridging and allows easy inspection. The TUBE-O-MAT® TUBE model is largely maintenance-free and moreover it is very easy to clean.

examples

FACTS

Tube volume:	16 litres/12 kg
Frame	5 mm flat iron stainless steel
Water supply:	23 x 2 mm stainless steel with female thread
Nipple:	Press nipple No. 93.255

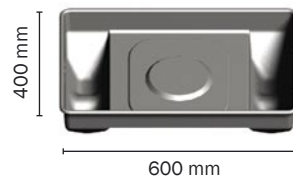

ADJUSTMENT HANDLE

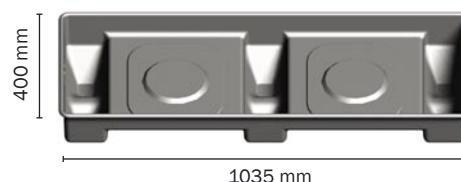

TUBE-O-MAT® tube feeder has an easy and accessible, user friendly adjustment lever with 10 settings, so the opening between the pipe and the trough can be regulated up to 15 mm.

TROUGHS IN STAINLESS STEEL

Finishers	18-120 kg
Trough height	16 cm
No. of pigs per trough:	30-50

Finishers	18-120 kg
Trough height	16 cm
No. of pigs per trough:	50-70
